WHITACRE LOGISTICS LLC

LTL Transportation Managed Better

Highly tailored contracted LTL rates powered by your data

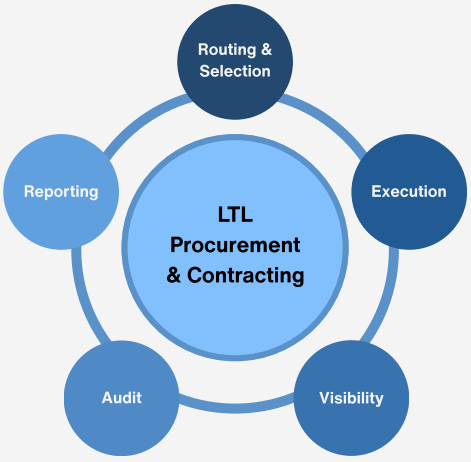

LTL costs are rising fast, with reweigh & reclass charges affecting up to 30% of shipments and accessorial charges up over 60% in five years...

Most shippers overpay for LTL freight due to carrier complexity, reclassifications, reweighs, and unmanaged accessorial charges. Whitacre uses your historical shipping data and our proprietary WHIT100 tariff to create a customized LTL program that reduces costs, improves carrier selection, and provides complete freight bill auditing

WHY CHOOSE US?

- Proprietary WHIT100 tariff
- Customer-facing TMS included
- Freight bill audit catches costly carrier errors
- Multi-carrier optimization
- Customized pricing based on your actual freight profile
- No disruption to shipping operations
- Dedicated transportation experts

Our system gives local managers and dock teams a simple pricing tool that preserves carrier choice while highlighting the most competitive options by lane. Using tiered FAKs, weight bands, and negotiated accessorials, Whitacre customizes your LTL pricing and audits each bill to catch misbills, reclass charges & reweigh errors.
